## Election of Officers Held at July Board Meeting

Larry Hole, P.E.

At the July 25th board meeting, the board held the election of officers. Lawrence (Larry) D. Hole, P.E. of Wichita, and engineer at the Boeing Company, was elected Chairperson of the Board. Hole began his service on the Board in 1998 by filling the unexpired term of Howard Depew, P.E. Hole was re-appointed by Governor Graves in 2000 to a four-year term. He has served in the following board offices: Vice-Chairperson, PE/LS Committee Chairperson, Secretary, and he has served on the Continuing Education and Complaint Committee. Mr. Hole is also a Fellow of ASME International (The American Society of Mechanical Engineers).

Also elected to offices were Cecil Kingsley, P.E., from Lawrence as Chairperson of the Engineering/Land Surveying Committee. Richard Moberly, Geologist, was elected as Chairperson of the Architect/Landscape Architect/Geology Committee. Tom Mulinazzi, P.E., L.S., was elected as Secretary of the Board. Joe Vanderweide, Architect, was elected as Vice-Chairperson.

## The University of Kansas Wins \$25,000 NCARB Grand Prize

by Laura C. Redcay  
NCARB Assistant Editor/Writer

Washington, D.C. - the National Council of Architectural registration boards is pleased to announce that the **University of Kansas** has won the \$25,000 grand prize in the 2003 NCARB Prize for Creative Integration of Practice and Education in the Academy competition. During NCARB's recent conference in San Antonio, Texas, KU's entry describing **Studio 804, Inc.**, was honored for its emphasis on community partnership and design excellence.

The NCARB Prize recognizes efforts to creatively link education and practice. Architecture schools with NAAB-accredited degree programs were invited to submit established projects, completed or in progress by the end of the fall 2002 semester, demonstrating unique initiatives that bring together the academy and the profession within the studio curriculum. Former NCARB president Peter Steffian, FAIA, laid the groundwork for the competition and continues to play an integral role in its search for outstanding programs.

Studio 804, Inc., is a nonprofit organization that offers a two-semester, graduate-level course synthesizing practice with the construction industry. The NCARB Prize Jury recognized the studio's long-term contributions to the Lawrence, Kansas community, its innovative restoration efforts, and its emphasis on sustainability and accessibility issues. Jurors described Studio 804 as raising the bar of student design quality and buildability. Since 1996, students have completed a full-scale project each year, including five homes, a roof restoration, and the design and construction of a canopy behind KU's architecture school.

A jury comprising the members of the Council's Practice Education Task Force and five deans of NAAB-accredited architectural programs, chosen by NCARB's regional leadership, selected six overall winners from 49 entries. The other NCARB Prize winning submissions each received a \$7,500 cash award. They are:

- the Clemson University School of Architecture's Center in Charleston ("Upper-Concord Street Neighborhood")
- Mississippi State University ("dialogic reciprocity: Binding form making to practice in first-year design")
- a combined entry from Pennsylvania State University and the University of Washington ("American Indian Housing Initiative")

NCARB Prize/to page 11

## Service Awards Presented to Board Members

Three board members were presented plaques for their years of service to the Board of Technical Professions. Cecil Kingsley, P.E., received a plaque for four years of service to the Board. Mr. Kingsley was appointed to the Board in 1999 by Governor Graves. Murray Rhodes, L.S., was honored for completing 12 years of service to the Board. Mr. Rhodes was appointed by Governor Finney in 1991. William P. Winslow, L.A., was also honored for his 12 years of board service. Mr. Winslow was also appointed by Governor Finney.

Thank you to these individuals for their service and leadership to the Board, the profession, and to the citizens of Kansas.

## AGENCY MISSION

To provide maximum protection of the health, safety and welfare of the people of Kansas by assuring that the practice of engineering, architecture, land surveying, landscape architecture and geology in the state is carried out only by those persons who are proven to be qualified as prescribed by the statutes and rules and regulations of the Board of Technical Professions.

**Programs Established To Assist With Agency Mission**  
Licensing, monitoring and regulating of technical professions:  
• Examine and certify Intern Engineers  
• License, monitor and discipline Engineers  
• License, monitor and discipline Architects  
• License, monitor and discipline Land Surveyors  
• License, monitor and discipline Landscape Architects  
• License, monitor and discipline Geologists  
• Licensing of Professional and General Corporations

# Disciplinary Action Taken by the Board

by Mark L. Bennett, Jr.,  
Board Attorney

## IN THE MATTER OF CHARLES CULLUM, L.S.

**Summary:** In December 2002, the Kansas State Board of Technical Professions received notice of a potential violation of the Board’s rules from a resident of Cowley County, Kansas. Concerns were voiced about a survey performed by Charles Cullum of Cullum Surveying, Inc. According to the contents of the letter, Mr. Cullum performed a boundary survey on a tract of land in Cowley County, Kansas during the year 1995 which was subsequently revised by him in June, 1999. According to the letter, the revised survey contained the same legal description as the 1990 survey. The letter went on to state that the measurements on the 1999 revised survey appeared on a real estate contract which was drawn up in the fall of 1996. As a result of this, it was the belief of the letter’s author that the 1999 revised survey was in fact performed in 1996. According to the author of the letter, his neighbors relied upon the revised survey and that reliance resulted in the neighbor selling 1/3rd of an acre of land that the letter’s author contended belonged to him.

Mark L. Bennett, Jr.,  
Board Attorney

Subsequent to the initial letter, the author of the letter again wrote to the Board on March 3, 2003, enclosing a 2nd survey performed by Mr. Cullum in August of 2000, which was also believed to be in error and in violation of the minimum standards for boundary surveys.

**Board Action:** Following completion of an investigation by the Board, Charles Cullum and the Kansas State Board of Technical Professions entered into a settlement agreement and consent order, the terms of which provided in part as follows:

- (1) Charles Cullum shall immediately conform his land surveying practices to generally accepted land surveying practices in the State of Kansas and the min-

imum standards for boundary surveys as adopted by the Kansas State Board of Technical Professions in K.A.R. 66-12-1.

- (2) Mr. Cullum shall perform a re-survey of the August 29, 2000 survey in question which will depict all elements necessary to the survey in a manner that will conform with the Kansas minimum standards for boundary surveys and which will correct all deviations from the minimum standards for boundary surveys as noted in the investigative report of the Board’s investigator. Said re-survey shall be conducted and completed on or before the 12th day of September, 2003 and then submitted to the Complaint Committee of the Board for its review no later than September 19, 2003.
- (3) Charles Cullum shall pay all expenses of the Board including attorney and investigation fees incurred in the investigation and prosecution of this matter in the amount of \$1,035.00.

**Status:** Mr. Cullum has paid the \$1,035.00 to reimburse the Board for its expenses including attorney and investigation fees. To date, the Board has not received the re-survey which is to be conducted and completed on or before the 12th day of September 2003 and submitted to the Complaint Committee of the Board no later than September 19th. The matter will not be closed until such time as the re-survey has been completed and submitted to the Complaint Committee of the Board and approved.

## IN THE MATTER OF FLOYD STUCKEY

**Summary:** On April 17, 2003, the Kansas State Board of Technical Professions received a letter from Floyd D. Stuckey requesting that his license to practice engineering in the State of Kansas, which had been revoked on July 12, 1982, be reinstated. Upon receipt of that request, the Complaint Committee of the Board determined that a formal hearing should be held regarding the reinstatement.

The Board’s records indicated that Mr. Stuckey had been licensed to practice engineering in the State of Kansas prior to May of 1982 and that on May 21, 1982 the Board of Technical Professions had filed a complaint alleging incompetence or misconduct on the part of Floyd Stuckey in the practice of engineering, in violation of the provisions of K.S.A. 74-7026(a)(2). This was as a result of his having affixed or permitted to be affixed his seal or name on a document that had not been prepared, reviewed or evaluated by him or prepared under his direct supervision or control, in violation of K.S.A. 74-7026(a)(5). Additionally at the time that complaint was filed, Mr. Stuckey was also charged with violations of certain of the rules of professional conduct adopted and promulgated by the Kansas State Board of Technical Professions which were in effect in 1982.

The circumstances that led to the filing of the 1982 complaint involved plans and specifications for an EPA funded waste water project for Udall, Kansas, which plans were submitted to the Department of Health and Environment by

Mr. Stuckey. Upon receipt of the Udall project plans and specifications, the Chief of the Water Pollution Control for the Kansas Department of Health and Environment noticed similarities to plans and specifications that had been previously submitted to the Department for a similar project in Kinsley, Kansas. Those plans and specifications for the Kinsley project had been prepared by Wilson and Company. A comparison of the pages of the two sets of plans and specifications revealed that they were identical and it was the opinion of the Chief of the Water Pollution Control for the Kansas Department of Health and Environment that Mr. Stuckey had copied the Wilson plans and then submitted them for the Udall project. Following a hearing on the complaint, Mr. Stuckey’s license to practice as a professional engineer was revoked for a period of two years.

Subsequent to the revocation of Mr. Stuckey’s license, he was charged in two separate felony cases in Cowley County District Court, both cases alleging theft counts. Following Mr. Stuckey’s conviction, he was placed on probation for five years with one of the conditions of probation being that he make restitution on the two counts.

Thereafter on August 8, 1984, Mr. Stuckey wrote to the Board requesting reinstatement of his license. Upon receipt of that request, the Board determined that it needed additional information from Mr. Stuckey prior to reaching a decision on the reinstatement. Mr. Stuckey was then requested to appear at a meeting of the Board, bringing with him copies of any civil or criminal actions that had been filed against him since the day that the suspension of his license, along with copies of any orders or journal entries setting forth the final disposition of those actions.

Thereafter in 1987, Mr. Stuckey was charged in Sedgwick County, Kansas with a misdemeanor violation of tampering with a public record. He subsequently entered a plea of guilty to that charge and was again placed on parole.

Upon receipt of Mr. Stuckey’s most recent request for reinstatement of his license, the complaint committee of the Board determined that a hearing should be held for the purpose of determining whether or not Mr. Stuckey’s revoked license should be reinstated. A hearing was then scheduled for July 25, 2003 and Mr. Stuckey was notified of the hearing date and advised that he would be given the opportunity to address the hearing panel and present his position with regards to reinstatement. Thereafter on July 25, 2003, a hearing was held, however, neither Mr. Stuckey nor anyone on his behalf appeared at the hearing.

### Board Action:

Following the hearing, the hearing panel entered its decision, finding as follows:

- (1) K.S.A. 74-7026(c) authorizes the Board to re-issue a license that has been revoked for reasons it deems sufficient, however, it is the petitioner who bears the burden of proving that he is entitled to be reinstated.
- (2) Since Mr. Stuckey did not appear at the hearing, he did not satisfy his burden of proof and therefore there was no evidence to support the application that his engineering license be reinstated.
- (3) Mr. Stuckey’s application for reinstatement is denied.

# Report of Alleged Violation Procedure

An important part of being a professional is helping to uphold the high standards of the profession. Webster's Dictionary defines a profession as "a calling requiring specialized knowledge and often long and intensive academic preparation." Similarly, a professional is one who is "characterized as conforming to the technical or ethical standards of a profession." The regard with which a profession is considered is a direct result of the manner in which those professionals engaged in it conduct their practice. With the title of professional comes the often very difficult responsibility of ensuring that the high standards of the professionals are maintained.

The "Rules of Professional Conduct," K.A.R. 66-6-4(p), states..."Each licensee with knowledge of any

alleged violation of K.S.A. 74-7001 et seq. or the rules and regulations promulgated and adopted by the board shall: (1) report the alleged violation to the board; and (2) cooperate with the board furnishing information or any assistance that may be required." To make this process easier, the following report of alleged violation form may be used. This use is not mandatory, however, and in many cases a written letter explaining the problem may provide even more information.

Inquiries may be sent to the Kansas State Board of Technical Professions, 900 SW Jackson, Room 507, Topeka, Kansas 66612-1257. It is important that the individual provide his or her name and address, as the Board cannot investigate anonymous inquiries.

# ATTENTION - All Architects who do not hold a NCARB Certificate

Have you ever tried to attain reciprocal registration and been turned down because you do not hold a NCARB Certificate? Have you tried to get the certificate and found that you need to have a NAAB accredited degree in addition to your experience and passing the Architectural Registration Exam? Did you think that your opportunities to gain registration in other jurisdictions were gone? This is not true in all cases. The National Council of Architectural Registration Boards established a process called the Broadly Experienced Architect that evaluates and identifies deficiencies in education and allows experience as a licensed architect to supplement the education. This is an alternative route to acquire your NCARB Certificate. The following describes the process and provides you with additional information:

You are considered a "broadly experienced architect" if you do not hold a NAAB-accredited degree and have verified experience as an architect (licensed) in comprehensive architectural practice over a prescribed number of years, depending on your level of post-secondary education. The required number of years of practice as an architect is determined as follows:

- ♦ If you hold a pre-professional degree in architecture that is a component of an NAAB-accredited, CACB-accredited, or CACB-certified professional degree program, you must demonstrate six years of practice.
- ♦ If you hold any other baccalaureate or higher degree, you must demonstrate eight years of practice.
- ♦ If you hold no degree, you must demonstrate ten years of practice.

Once your eligibility for BEA has been determined and if you have any post-secondary education, you must obtain an evaluation of your education from the National Architectural Accrediting Board (NAAB). NAAB administers the Education Evaluation Services for Architects (EESA) program which compares your education with the NCARB education requirements. NAAB charges a fee for this service. If you have very little or no post-secondary education, such an evaluation is not required.

To contact NAAB: National Architectural Accrediting Board  
1735 New York Ave., N.W., 3rd Floor  
Washington, DC 20006  
202/783-2007  
[www.naab.org](http://www.naab.org)

The EESA evaluation will identify your education deficiencies. When NCARB has your evaluation in hand, they will ask you to prepare a dossier that must show how you acquired learning from your experience in the identified areas of deficiency. You must submit a fee of \$1,000 at this stage. If an EESA evaluation is not required, you must demonstrate learning in all subject areas.

Three members of the BEA Committee will review your dossier and make written reports to the Committee. The Committee will come to consensus at its next scheduled meeting as to whether or not you have demonstrated the required learning. If you have done so, the Committee will invite you for an interview to be held at its subsequent meeting. The interview is conducted by three committee members and is intended to verify the material presented in your dossier. If your dossier does not demonstrate the required learning, you may reapply after acquiring additional knowledge from your experience. If your interview is successful, you will receive the NCARB Certificate, assuming all other requirements have been met. NCARB charges an additional fee of \$750 for the interview.

The BEA Committee meets three times per year at approximately four-month intervals. NAAB requires three months to perform an EESA evaluation. The amount of time it takes to go through the BEA process is nine months to one year.

For further information, contact Michiel Bourdrez; NCARB 202-879-0535; [Mbourdrez@ncarb.org](mailto:Mbourdrez@ncarb.org)

## KANSAS STATE BOARD OF TECHNICAL PROFESSIONS REPORT OF ALLEGED VIOLATION FORM

1. Your Name, Address, & Phone Number:

2. Address of the building or project:

3. Name & address of person being reported:

4. Name of owner of project (if known):

5. Name of construction company involved in project (if known):

6. Please describe why you believe there may be a violation of our laws concerning this project:

7. Please provide any other information you believe is relevant to your complaint:

Date:                      Signature:

## 2003 NCARB Annual Meeting Review

NCARB’s 84th Annual Meeting and Conference was held in sunny, hot and humid San Antonio, Texas, June 25 through June 28, at the Hilton Palacio del Rio. In attendance were Betty Rose, Joe Vanderweide and Chip Winslow (as President of CLARB and a Kansas Board Member). The meeting started with our Region 5 Meeting on Wednesday afternoon to review resolutions and discuss the events of the next few days.

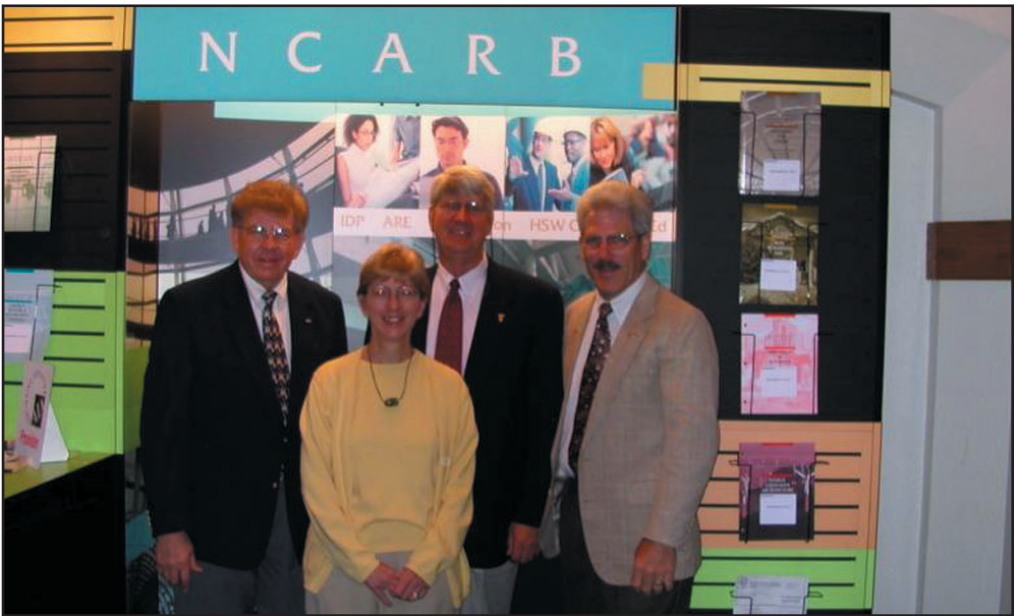

The meeting’s First Business Session on Thursday included a keynote address from AIA New York Executive Director, Rick Bell, FAIA on the Will Libeskind design for the World Trade Center, as well as reports from the president, secretary, treasurer, and executive vice president. Candidate speeches followed the Annual Luncheon. Meeting attendees then split up for various workshops held that afternoon.

On Friday, during the Second Business Session, representatives from the Broadly Experienced Architect Committee (including our own Stan Peterson) and the ARE Administration Task Force delivered presentations about their respective work. Bonnie Larson-Staiger, Member Board Executive for North Dakota and FY03 MBE Committee Chair, also discussed the results of the annual quality assurance audit. A Town Meeting closed out the morning of the second day of business and was followed by another round of workshops. The afternoon was spent in Regional Meetings with visits by candidates for offices and additional discussion on the resolutions.

Saturday morning witnessed a brisk run through the agenda, which included the President-elect’s address from Bob Boynton, a welcome to next year’s Annual Meeting site (Portland, OR), elections of officers and the announcement of the 2003 NCARB Prize grand prize winner (the University of Kansas. See related article on pages 1 and 11). Fifteen resolutions were also discussed and voted on, leading to the following results.

Resolution 03-1: “Bylaw Amendment-Renaming Member Board Administrators Committee” Passed: 50-0-0. A housekeeping change submitted by Region 6, Resolution 03-1 was overwhelmingly supported by delegates at the Annual Meeting. Under this subtle though significant change, Member Board Administrators will now be known as Member Board Executives--a shift that recognizes “the evolving practice of naming the top Member Board staff person an ‘Executive’ rather than an ‘Administrator.’”

Resolution 03-2: “Modification to the Broadly Experienced Architect Eligibility Criteria”  
The amendment by Region 6 passed: 47-1-2. The amended motion passed: 48-2-0.

Pictured from left to right are: Joe Vanderweide, Arch.; Betty Rose, Stan Peterson, Arch.; and Chip Winslow, L.A.

Resolution 03-3: “Technical Changes to Legislative Guideline I A”  
Passed 49-1-0.

Resolution 03-4: “Technical Changes to Legislative Guideline IV and Model Law”  
Passed: 48-1-1.

Resolution 03-5: “Delete Reference to Personal Interview in Legislative Guidelines”  
Passed: 46-4-0.

Resolution 03-6: “Amendment to Model Law Section 11”  
Passed: 50-0-0.

Resolution 03-7: “Allowance for President and First Vice President”  
Passed: 47-1-2.

Resolution 03-8: “Revocation of Northern Mariana Islands Council Membership for Failure to Pay Regional Dues”  
Not moved.

Resolution 03-9: “Tri-National Memorandum of Intent and Understanding”  
Passed: 49-1-0.

Resolution 03-10: “Architects’ Council of Europe Accord”  
Passed: 44-4-2.

Resolution 03-11: “International Agreement Ratification”  
Passed: 50-0-0.

Resolution 03-12: “Special Task Force”  
Not moved.

Resolution 03-13: “Confidential Information”  
Not moved.

Resolution 03-14: “Amendment to Council Bylaws-The Council Board of Directors”  
Not moved.

Resolution 03-15: “Publishing of Comprehensive and Unabridged NCARB Accrual Basis Financial Statements on NCARB’s ‘Members-only’ Web Page Quarterly”

The amendment by Region 3 passed: 41-2-7. The amended motion passed: 38-7-5.

Should you have questions related to any of these resolutions contact the Board office or NCARB.

**Director of Public Works & Parks**

This is a **full-time position**  
with the **City of Derby**  
*Applications will be accepted until filled.*

**BRIEF SUMMARY:**

Under the general supervision of the City Manager, the Director of Public Works and Parks is a highly responsible administrative position. Responsibilities include directing, planning, and coordinating all work for the divisions of Public Works and Parks in a manner that is consistent with the amount of public contact. This employee is guided by policies and assignments issued by the City Manager, but exercises considerable independence in judgement and is held accountable for the bottom-line quality of services provided and achieving desired results.

**REQUIREMENTS:**

At least five years of supervisory experience in Engineering, Public Works, or related field is required. A thorough knowledge of street construction, maintenance and repair, park operations, and stream maintenance is preferred, particularly as applied to municipal governments. Graduation from an accredited college or university with a degree in Civil Engineering, Construction Management, or related field is required.

Excellent benefits.  
Salary is Dependent on Qualifications.  
View complete position description and  
apply online at [www.derbyweb.com](http://www.derbyweb.com)

meet the Kansas Fire Prevention Code per K.S.A. 31-133. All new structures and changes in use must have: 1) a code footprint (written and graphic description of a building's occupant life safety as prescribed by the Kansas State Fire Marshal Office) prepared by a Kansas architect or engineer in order to be accepted as compliant to the Kansas Fire Prevention Code at a minimum; 2) establish the maximum occupant load and post it publicly; and 3) **an automatic fire sprinkler when there is more than 300 occupants or over 5,000 square feet**; and 4) a fire alarm system when there is more than 300 occupants; and 5) documentation to indicate the fire alarm and automatic sprinkler systems are designed and installed in accordance with adopted codes.

#### BACKGROUND:

The Kansas State Fire Marshal is responsible for adopting reasonable rules and regulations for the construction and maintenance of exits, fire alarm and automatic fire sprinkler systems in all buildings, other than structures used wholly as one and two family dwellings. This authority includes structures where alcoholic beverages may be served publicly or privately, including bars, restau-

## Automatic Fire Sprinkler Required

*Written for the State Fire Marshal Office by Rick Fay, Architect*

#### INTERPRETATION:

All structures used for the consumption of alcohol must

rants, clubs, conference areas, fairgrounds, etc.

Since May 1993, the Kansas State Fire Marshal has had regulation and nationally promulgated code in place to require automatic fire sprinklers and fire alarms in assembly occupancies with over 300 occupants in addition to exiting. Due to changes in administration and recent tragic life loss, the Kansas State Fire Marshal is reminding people living and working in Kansas, that exits, fire alarms and automatic fire sprinkler systems are the responsibility of building owners and operators. Provided exits, automatic fire sprinklers and fire alarm systems shall be maintained working. In Kansas a new structure or use cannot be accepted as compliant to one of the building and fire codes unless it is designed or approved by a Kansas architect or engineer (See Kansas Statute 74-7038). The state fire marshal does not accept a new facility as compliant to the Kansas Fire Prevention Code unless a code footprint is prepared and sealed by a Kansas architect or engineer.

Occupant loads are calculated on use. Dance floors and lobby areas occupant load is based on 1 person per 7 square feet while dining areas with tables are based upon 1 person per 15 square feet. To avoid overcrowding, maximum occupant loads shall be established, maintained and not exceeded.

NCARB Prize/from page 1

- the University of Maryland (“Building Connections... Building Practice”)
  - Virginia Polytechnic Institute and State University (“The Art of Integration/The Science of Building”)
- Projects from Yale University (“Yale Building Project”) and the University of Puerto Rico (“Re-building the City through community design”) received honorable mention.

The 2003 NCARB Prize jury were: Janet R. White, FAIA, jury chair; David Mahoney, AIA; Peter T. S. Rasmussen, FAIA; Barbara A. Sestak, AIA; Peter Steffian, FAIA; John Carter Wyle, AIA; Howard E. Goldstein, AIA, Wentworth Institute; James L. West, FAIA, Mississippi State University; Mark C. Engelbrecht, FAIA, Iowa State University; R. Wayne Drummond, FAIA, University of Nebraska; and Gregory A. Kessler, AIA, Washington State University. (The University of Virginia’s Karen Van Lengen, AIA, was unable to take part in the proceedings.) Michael M. Bourdrez, AIA, director, professional services, served as the staff liaison to the NCARB Prize jury.

The call for entries for the 2004 NCARB Prize will be distributed in the late summer 2003. NCARB will also issue the 2003 NCARB Prize book in August.

**2003 NCARB Prize - Grand Prize Winner  
University of Kansas**

**Project**

Studio 804, Inc.

**Abstract Excerpt**

The design/build studio is a nonprofit organization that is operated 10 months of the year by the Master of

Architecture students and two professors as a two-part thesis project. Students are thrust into an intensive design/build process with community organizations that results in a house that is sold to a low-income family.

**Intent**

- To provide a practical, real-world learning environment for architectural students within a nonprofit design/build organization.
- To synthesize a connection between architectural education and architectural practice.
- To work with nonprofit organizations to produce an alternative to current affordable housing types.
- To provide a structural learning environment involving management of materials, budgets, construction schedules, and construction.
- To work with local businesses, trades, and manufacturers to produce an economical and innovative house.
- To inspire graduates to produce meaningful work within the contemporary marketplace.

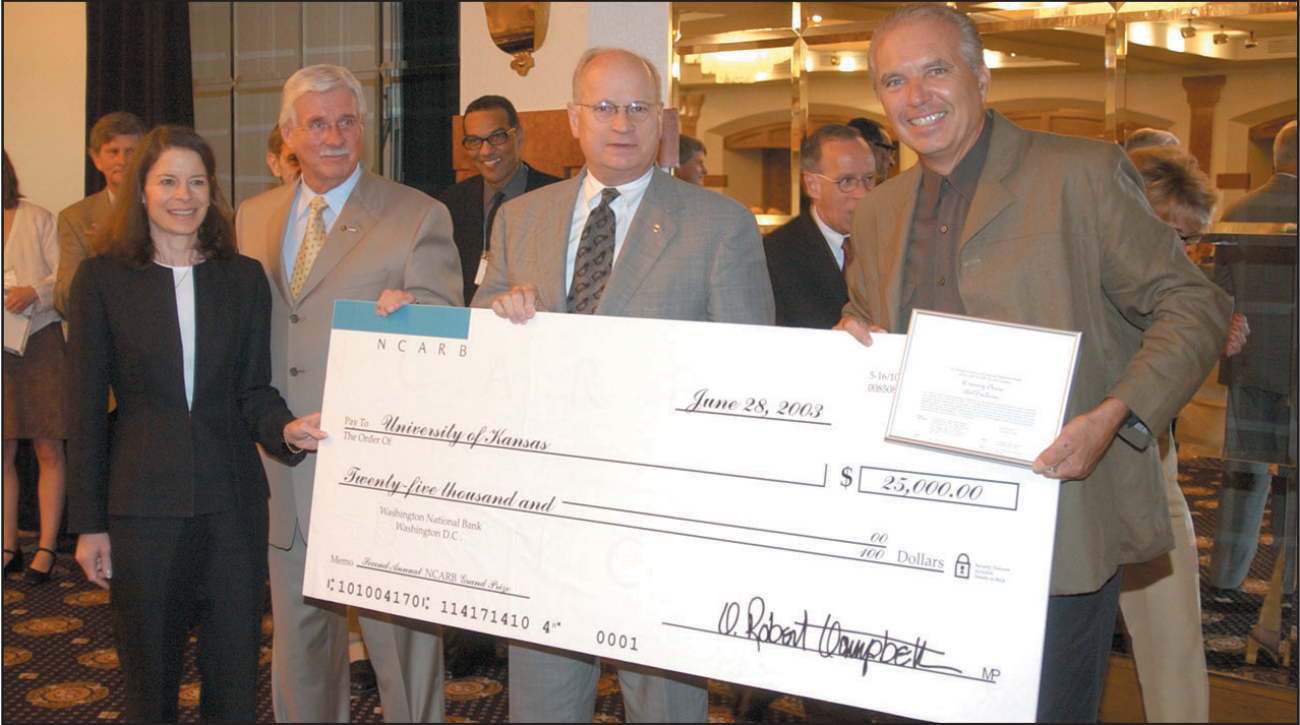

**Participants**

Faculty: John C. Gaunt, FAIA, Dean; Don Rockhill, Professor; Kent F. Spreckelmeyer, FAIA, Professor

Dean: John C. Gaunt, FAIA, Dean, School of Architecture

Nonprofit Client: Tenants to Homeowners, Inc.

Students: Christina Assmann, Christine Boehne, Jean Dodd, Carl Drafall, Lindsey Ericson, Jessica Fishback, Evan Fox, Brian Garvey, Kevin Gillian, Dirk Henke, Izumi Kitajima, George Lewis, Frank Louis, Diane Mansfield, Lindsey Piant, Christine Prescott, Michael Schager, Erin Shea, Brian Spainhour, and Kyle Unruh.

Pictured from left to right are: Janet White, FAIA, Jury Chair; C. Robert Campbell, FAIA, NCARB President; Peter Steffian, FAIA, NCARB Past-President; and Dan Rockhill, Professor, University of Kansas.
